

Overview

OBX1004 is the portfolio of the optical TAP chassis. It is the 19-inch 1U box with 4 slots, and it allows flexible configuration of the optical TAP cards.

OBX1004 are widely used in the fields of telecom operator, broadcasting, electricity power and information security etc. Featuring in independent and transparent transmission signal, guaranteed safety and reliability, the products are capable of helping users to monitoring diverse optical signals from an optical communication network.

Features

- Cost-effective which is easy for network deployment and expansion.
- Hot pluggable of up to 4 optical TAP cards.
- Support mixed configuration of optical TAP cards with different TAP ratio and output numbers.
- Offer true passive monitoring solutions for different type of optical networks.

Specifications

Features	Parameter
Dimensions	440*226*44.5mm
Number of slots	4 slots
Weight	Less than 2kg
Operating temperature	-10°C ~ 50°C
Storage temperature	-40°C ~ 85°C
Humidity	5% ~ 95% (Non-condensing)

Order Information

Order Number	Description
OBX1004	Optical line protector chassis, 1U rack mount, 4 slots.
